

Kollias Property Inspections

"Helping you make an informed decision"

A professional home inspection involves a comprehensive check and analysis of numerous items.

The Exterior

Roof, Chimneys, Flashing, Valleys

Gutters, Downspouts

Siding, Trim, Windows & Storms

Driveways, Patios Decks, Porches

Air Conditioner Compressor

Landscaping

**WHY INSPECT IT
before you
BUY OR
SELL?**

A home inspection protects what matters most

You and your family.

**Quality Visual Observations
and Evaluations**

My Focus:

- Is the home safe?
- Is everything operational at this time?
- How much longer will it likely continue to function?
- Are there deficiencies or signs of potential failure?
- Are the components installed in a professional workmanlike manner?

The Interior

Electrical Systems

Plumbing Systems

incorporated in the State of Illinois

A Home Inspection is a Comprehensive Visual Evaluation

Structure - We complete a full thorough inspection on the inside & outside, foundation, crawl spaces, basements.

Plumbing - Water pressure, flow, and inadequate drainage are just the starting point.

Electrical - We check for open wiring, undersize wiring, double tapping, undersized service and much more.

- Computerized report with photos.
- We use high tech equipment such as a gas leak detector, sure test meter, carbon monoxide analyzer, etc.
- **24** hours of continuing education yearly.
- Serving greater Chicagoland and surrounding communities

Benefits for the Seller

HOUSE FOR SALE

Our home inspection gives you a competitive edge over other homes on the market.

It helps sell your home faster at the highest price possible. It also provides for a full disclosure and gives the buyer greater piece of mind.

It also gives you the opportunity to make any repairs to your home in advance - expediting the sale.

7 Reasons to hire a Home Inspector

Roofs - The style, # layers, type and quality of installation are checked.

Ventilation - Attic ventilation and insulation play a very important role in moisture, condensation and roof life. A key factor in how your home is functioning.

Drainage - Reversed or inadequate drainage cause water problems. Proper downspouts, gutters & pitch play an important part of moisture control.

HVAC - We check the age, condition & safety of each. The wrong burn pattern and moisture production can cause premature heat exchanger failure & possibly carbon monoxide.
